5th GRADE SCIENCE CAMP

Next week (October 26-28), most 5th graders will be at Science Camp, also known as *San Joaquin County's Outdoor Education Program.*

Science Camp encourages children to experience a rich, science-based environment, as well as learn to appreciate the bounty and diversity of the earth by taking a responsible role in protecting natural resources. The students will have an exciting time learning about nature and enjoying Science Camp with their friends.

A total of 21 students in our class are going to Science Camp. Students not going will be in class as usual for the 3 days.

The Importance of Attendance

Every day brings important new learning opportunities for our students. To help your child succeed, please make every effort to ensure they arrive on time and stay for the entire school day.

While homework and assignments can be made up, nothing can replace the live instruction, classroom discussions, and hands-on activities that help to build understanding and achieve mastery.

We understand that some absences are unavoidable, but unnecessary time away from class disrupts your child's learning momentum. Whenever possible, please try to schedule medical and personal appointments after school hours. Thank you for your support

Online Gradebook

The Online Gradebook is available on our class website. Please log in for a detailed grade report.
